

SUSTAINABLE TRANSPORTATION

ELECTRIC VEHICLES

Electric Vehicles (EVs) are an important way to reduce greenhouse gas emissions and air pollution. Driving electric vehicles instead of vehicles with internal combustion engines (ICE), which run on fossil fuels can drastically reduce the carbon footprint of passenger vehicle trips.

PUBLIC EV CHARGING STATIONS

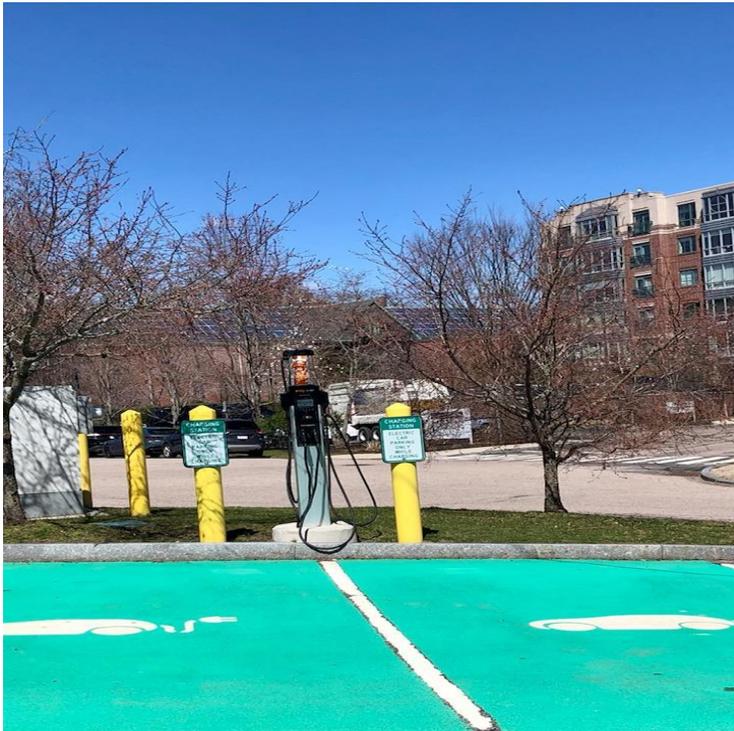

To accommodate EV drivers and those visiting our community, the Town offers 2 public charging stations in our Town.

LOCATIONS ARE:

Town Hall 525 Canton Ave. Milton MA 02186 (rear of the building)

Parking lot 98 Wharf St. Milton MA 02186 (side of parking lot)

- The Town of Milton staff is now using 3 electric vehicles
- The Town is continuing to install electric vehicle charging stations.

WHY DRIVE ELECTRIC

Take advantage of discounts and incentives. Green Energy Consumers Alliance also provides discounts for Massachusetts residents. Electric vehicle owners can save through federal tax incentives.

When and how you charge your vehicle can make a impact on the emissions, local electricity, and the price you pay for electricity.
